

From the Editor: Engineering Allows You To Be Part of History

April 2021, *Informed Infrastructure*

Mr. Schickel,

Thank you for your "From the Editor" column in the April 2021 issue of *Informed Infrastructure*. You described exactly how I feel with respect to the many bridge projects I worked on. Most of my career (I started in 1984) was spent with the famous East River bridges in New York City, mostly on the Brooklyn Bridge.

Sincerely,
Curtis A. Cohen, P.E.

Mr. Cohen,

It sounds like you worked on some great projects! Keep up the good work. It's hard to explain to some folks just what it's like to be an engineer.
